DWARSPROFIEL 104

OPGEMETEN IN: 2010

DWARSPROFIEL 104

Km	4,455
Hsch	1
Lsch	1
Vvlak	19 T.A.W.

The figure shows a cross-section profile of a road. The profile is a line graph with a horizontal axis representing distance and a vertical axis representing elevation. The profile starts at a low elevation on the left, rises to a peak labeled 'LO' (likely a local maximum or a specific point of interest), and then drops sharply to a lower elevation on the right. The profile is divided into several segments by vertical lines, possibly representing different road sections or construction phases.
