The diagram shows a cross-section profile of a waterway. The top part is a line graph with elevation on the y-axis and distance on the x-axis. The profile starts at an elevation of 16.80, remains relatively flat until a point marked 'LO' at distance -2.023, then drops sharply to a minimum elevation of 15.26 at distance 0.043, marked 'Broekloop'. It then rises to a point marked 'RO' at distance 3.030 and remains relatively flat until distance 12.569. The bottom part is a table with four rows: Hoogtepeil, Slibpeil, Kumulafstand, and Tussenafstand. The Hoogtepeil row shows elevations at various points. The Slibpeil row shows silt levels. The Kumulafstand row shows cumulative distance. The Tussenafstand row shows the distance between points.
