

The diagram illustrates a cross-section of a dam structure. The vertical axis represents elevation, ranging from -2 to 12. The horizontal axis represents the distance across the dam. The dam body is shown as a series of vertical sections. A cyan line represents the water surface profile. A red vertical line is drawn through the dam. Two green circles are marked on the cyan line. The left side is labeled 'L.O.' and the right side is labeled 'R.O.'. The bottom left is labeled '0m TAW'.
