

200 P.K. 8.83119

The diagram shows a 2D cross-section of a landscape. A blue line represents the ground surface, which is mostly flat but has a slight dip in the middle. Five green trees with brown trunks are positioned along the ground line. The first tree is on the left, followed by a gap, then three more trees, and a final gap on the right. The trees vary in size and are drawn with a simple, stylized green foliage.
