Vergelijkingsvlak
 15m.

The diagram shows a longitudinal profile of a road section. The horizontal axis represents distance, and the vertical axis represents elevation. A cyan line represents the existing ground surface, and a black line represents the proposed road grade. The road grade starts at a high elevation on the left, drops to a minimum point marked with an asterisk (*), and then rises to a high elevation on the right. A vertical red line is drawn at the minimum point of the road grade. The profile is divided into several vertical sections by thin black lines. The text '183' is at the top left, 'lengteschaal 1/100' and 'hoogteschaal 1/100' are below it, and 'Vergelijkingsvlak 15m.' is at the bottom left.
