DWARSPROFIELPLAN

Opgemeten volgens bestek: M-05-001

The diagram illustrates a cross-section of a ditch or channel. On the left, a vertical line marks the 'beginpunt begroeiing' (start of vegetation). The ditch is defined by a 'kruinbreedte (m)' (crown width in meters) of 0.00. The bottom of the ditch is composed of three layers: 'vaste bodem' (fixed bottom), 'slibbodem' (sludge bottom), and 'haag' (haag). The right side of the ditch is closed by a 'muur' (wall) made of 'hout' (wood). The ditch is filled with 'aarde' (earth) and has a 'weide-afsluiting' (pasture closure) made of 'beton' (concrete) and 'metselwerk' (masonry). The ditch is also labeled 'afsluiting' (closure).
