

Dwarsprofiel_104

DWARSPROFIELPLAN

The diagram illustrates a cross-section of a dike with the following components from left to right:

- beginpunt begroeiing**: Indicated by a green circle.
- 0.00**: A blue double-headed arrow indicating a distance or width.
- kuinbreedte (m)**: A label for the width of the dike.
- afsluiting algemeen**: A vertical line with 'x' marks, representing a general closure.
- vaste bodem**: A light blue horizontal line representing the fixed ground.
- as dwarsprofiel**: A red vertical dashed line representing the axis of the cross-section.
- haag**: A vertical line with a jagged, tree-like profile representing a hedge.
- slibbodem**: A black horizontal line representing the silt ground.
- kunstwerk**: A red horizontal line representing an artificial structure.
- gebouw**: A vertical line with diagonal hatching representing a building.
