DWARSPROFIELPLAN

The diagram illustrates a cross-section of a dike structure. On the left, a green circle represents the 'beginpunt begroeiing' (start of vegetation). A blue double-headed arrow indicates the 'kruinbreedte (m)' (crest width) with a value of 0.00. The dike is composed of several layers: 'vaste bodem' (fixed ground) shown as a red dashed line, 'slibbodem' (silt ground) shown as a red solid line, and 'kunstwerk' (artificial structure) shown as a red solid line. The top of the dike is marked with 'afsluiting algemeen' (general closure) and 'afsluiting hoogwater' (high water closure). The dike is flanked by 'haag' (hedge) on both sides. On the right, a building is shown with the label 'gebouw'.
