The figure is a cross-section profile of a waterway. The top line represents the ground surface (VASTE BODEM) in cyan. Below it, a black line indicates the silt level (SLIBBODEM). The area between the ground and silt levels is shaded light blue. A red vertical line marks a specific point in the profile. The profile is divided into vertical sections by thin black lines. Below the profile is a table with four rows of data: HOOGTEPEIL, SLIB, KUMULAFSTAND, and TUSSENAFSTAND. The HOOGTEPEIL row shows elevations ranging from 23.92 to 29.77. The SLIB row shows silt levels ranging from 24.66 to 24.84. The KUMULAFSTAND row shows cumulative distances ranging from -7.22 to 23.92. The TUSSENAFSTAND row shows individual section distances ranging from 1.55 to 2.34.
