The figure is a cross-section profile of a watercourse. The top part is a line graph showing the ground level (cyan line) and the bed level (black line). The ground level starts at an elevation of 43.95 on the left and generally decreases to a minimum of 41.10 in the center, then rises to 45.33 on the right. The bed level follows a similar trend but is lower, with a minimum of 40.66. A red vertical line marks the center of the watercourse. Below the graph is a table with four rows: HOOGTEPEIL, SLIB, KUMULAFSTAND, and TUSSENAFSTAND. The HOOGTEPEIL row shows elevations at various points. The SLIB row shows the thickness of the silt layer. The KUMULAFSTAND row shows cumulative distances. The TUSSENAFSTAND row shows distances between points.
