The figure is a cross-section profile of a waterway. The top part shows a cyan line representing the 'VASTE BODEM' (fixed bed) and a black line representing the 'SLIBBODEM' (mud bed). The profile is divided into sections by vertical lines. The elevation of the fixed bed is shown in the 'HOOGTEPEIL' row, and the elevation of the mud bed is shown in the 'SLIB' row. The 'KUMULAFSTAND' (cumulative distance) is shown in the third row, and the 'TUSSENAFSTAND' (intermediate distance) is shown in the fourth row. A red vertical line is drawn through the center of the profile, indicating the 'AS WATERLOOP' (water loop axis). The profile shows a slight dip in the center, with the elevation of the fixed bed reaching a minimum of 44.43 at the center. The elevation of the mud bed is consistently lower than the fixed bed, with a minimum of 44.00 at the center. The cumulative distance starts at -15.07 on the left and ends at 15.03 on the right. The intermediate distance starts at 0.07 on the left and ends at 1.38 on the right.
