LEGENDE

The figure shows a cross-section profile of a ditch. The top line (cyan) represents the terrain (vaste bodem), and the bottom line (black) represents the subsoil (slibbodem). The profile is divided into segments by vertical lines. A red vertical line marks a specific point. A green dot on the terrain line indicates the start of vegetation (beginpunt begroeiing). A series of 'x' marks on the terrain line indicates a hedge (haag). The profile shows a ditch with a depth of approximately 1.5m at its deepest point. The terrain is relatively flat on the left and right, with a slight dip in the center where the ditch is located. The subsoil is also relatively flat, with a slight dip corresponding to the ditch. The profile is labeled with various data points, including elevations and distances.
