The figure is a cross-section profile of a watercourse. The top line (cyan) represents the ground level (VASTE BODEM). The bottom line (black) represents the bed level (SLIBBODEM). The area between them is shaded light blue. A red vertical line indicates the water level (AS WATERLOOP). The profile shows a slight dip in the center, with a small green circle marking the lowest point of the bed. The x-axis represents the distance along the watercourse, and the y-axis represents the elevation. The data is summarized in the table below:
