The diagram is a cross-section profile of a landscape. A cyan line represents the 'vaste bodem' (fixed ground) level, which starts at 15.80 on the left, rises slightly to 16.13 in the middle, and then drops to a minimum of 14.00 before rising again to 15.73 and ending at 15.82 on the right. A black line represents the 'slibbodem' (silt bottom) level, which is mostly below the ground surface, with a peak of 14.57 in the center. A green circle marks the 'begin begroeiing' (start of vegetation) at a ground level of 14.91. A red vertical line with an 'x' marks a specific point at a ground level of 15.73. Various other features like 'haag' (hedge) and 'boerand' (farm boundary) are indicated by green lines. The area between the ground and silt bottom is divided into vertical sections, each with a width and a corresponding ground level value.

PEIL VASTE BODEM	15.80	15.80	15.95	16.13	16.06	16.17	16.12	15.71	15.21	14.91	14.09	14.14	14.00	14.65	15.00	15.73	15.82	15.82	15.79	15.82	15.82	15.82
