- The figure is a cross-section profile of a riverbed. The top line represents the ground surface (VASTE BODEM) in cyan. The bottom line represents the bed level (SLIBBODEM) in black. A red vertical line indicates the water level (AS WATERLOOP). The profile shows a central depression with a water level above it. The ground surface is relatively flat on the left and right, with a slight dip in the center. The bed level shows a significant dip in the center, corresponding to the water level. The profile is divided into sections by vertical lines, with elevation and distance data provided for each section.
