- The figure is a cross-section profile of a waterway. The top line represents the water level (AS WATERLOOP) in red. Below it, the solid cyan line represents the fixed bed (VASTE BODEM). The dashed black line represents the silt bed (SLIBBODEM). The profile shows a central channel with a slight dip, flanked by higher banks. Two green circles mark the edges of the bank vegetation (RAND VAN DE OEVERBEGROEIING). A vertical red line indicates a crossing point (KRUISING AFSLUITING). The profile is divided into vertical sections by thin black lines, corresponding to the data table below.
