- The figure is a cross-section profile plan. The top part shows a profile line with elevation points. A red vertical line indicates the water level. Below the profile, there are three rows of data: HOOGTEPEIL (Elevation), SLIB (Silt), and KUMULAFSTAND (Cumulative Distance). The bottom row shows the distance between points (TUSSENAFSTAND). The profile line starts at an elevation of 32.45 and ends at 30.83. The silt layer is shown as a shaded area between the profile line and the silt level. The cumulative distance starts at -7.17 and ends at 18.97. The distance between points is shown in the bottom row.
