The figure is a cross-section profile of a watercourse. The top part shows a cyan line representing the ground surface (VASTE BODEM) and a black line representing the silt bed (SLIBBODEM). The profile is divided into vertical sections by thin black lines. A red vertical line is drawn through the center of the profile, indicating the water level (AS WATERLOOP). Two green circles mark the edges of the watercourse (RAND VAN DE OEVERBEGROEÏNG). Below the profile is a table with four rows: HOOGTEPEIL, SLIB, KUMULAFSTAND, and TUSSENAFSTAND. The HOOGTEPEIL row shows elevation values for each section. The SLIB row shows silt values. The KUMULAFSTAND row shows cumulative distance values. The TUSSENAFSTAND row shows distance values between sections. The table has 20 columns, corresponding to the 20 sections of the profile.
