slibbodem

The figure is a cross-section profile of a riverbed. The horizontal axis represents distance, and the vertical axis represents elevation. A red vertical line marks the center of the riverbed, labeled 'MOLENBEEK'. The profile shows a V-shaped riverbed with a cyan line representing the 'vaste bodem' (solid ground) and a black line representing the 'slibbodem' (silt bed). The terrain is divided into sections by vertical lines, with elevation values provided for each section. The profile shows a slight rise on the left side and a slight dip on the right side, with the riverbed itself being the lowest point.
