The figure is a cross-section profile of a riverbed. The horizontal axis represents distance in meters, and the vertical axis represents elevation in meters. The profile shows a series of vertical lines representing the riverbed at different points. A red vertical line labeled 'MOLENBEEK' is positioned at the center of the profile. The profile starts at an elevation of 34.51m on the left and ends at 35.01m on the right. The elevation drops to a minimum of 31.07m at the 'MOLENBEEK' location and then rises to a peak of 34.83m before ending at 35.01m. The profile is marked with various symbols from the legend, including a building, a wall, a hedge, and a vegetation start point.
