slibbodem

The figure is a cross-section profile of a riverbed. The horizontal axis represents distance, and the vertical axis represents elevation in meters. A cyan line represents the 'vaste bodem' (fixed bed), and a black line represents the 'slibbodem' (silt bed). The profile shows a valley with a central channel. A red vertical line marks the center of the channel, labeled 'MOLENBEEK'. The terrain is divided into sections by vertical lines, with elevation values provided for each section. The silt bed is shown below the fixed bed, indicating the depth of silt accumulation.
