The figure shows a cross-section profile of a landscape. The ground surface is represented by a cyan line, and the bottom of the stream is shown in black. A red vertical line marks the location of the stream, labeled 'MOLENBEEK'. Various features are indicated by symbols: a building (hatched rectangle), a wall (hatched rectangle), a hedge (dashed line), a vegetation point (green dot), a path (double line), and a street name (line with a perpendicular tick). The profile is divided into sections by vertical lines, with elevations and distances provided in the table below.
