The figure is a cross-section profile plan of a riverbed. The top part shows a terrain profile (cyan line) and a silt profile (red line). The terrain profile starts at an elevation of 81.11 on the left and rises to 85.41 on the right. The silt profile starts at an elevation of 81.61 on the left and rises to 85.27 on the right. The area between the terrain and silt profiles is shaded light blue. The area below the silt profile is shaded light green. The profile is divided into sections by vertical lines. Two green circles mark specific points on the terrain profile. A red line marks the start of the silt profile. A black line marks the end of the silt profile. Below the profile is a table with four rows: MATEN TERREIN, TUSSENAFSTANDEN TERREIN, GEKUMULEERDE AFSTANDEN TERREIN, MATEN SLIB, TUSSENAFSTANDEN SLIB, and GEKUMULEERDE AFSTANDEN SLIB. The first three rows have data, while the last three rows are empty.
