The figure is a cross-section profile of a waterway. The top part shows a cyan line for 'vaste bodem' (firm ground) and a black line for 'slibbodem' (mud bottom). A pink hatched area represents a 'gebouw' (building). A red line with 'x' marks represents 'afsluiting, prikkeldraad' (closure, barbed wire). A red line with 'o' marks represents 'algemene afsluiting' (general closure). A green line with 'x' marks represents 'afsluiting, betonpaaltjes + prikkeldraad' (closure, concrete posts + barbed wire). A green line with 'o' marks represents 'haag' (hedge). A green dot represents 'beginpunt oeverbegroeiing' (starting point of bank vegetation). The profile shows a building on the left, a closure with barbed wire, a general closure, a closure with concrete posts and barbed wire, a hedge, and a starting point of bank vegetation. The profile is divided into sections by vertical lines. The bottom part of the figure is a table with four rows: BODEMPEIL, SLIBBODEM, CUMULAFSTAND, and TUSSENAFSTAND. The table contains numerical data for each section.
