The figure is a cross-section profile of a waterway. The horizontal axis represents distance, and the vertical axis represents elevation. The profile shows a waterway with a central channel and side banks. The ground level is indicated by a cyan line, and the silt level is indicated by a black line. A red vertical line marks a specific point in the channel. The profile is divided into sections by vertical lines, with numerical values for ground level, silt level, and distance provided for each section.
