The figure shows a cross-section profile of a waterway. The top line (cyan) represents the 'vaste bodem' (fixed bottom), and the bottom line (black) represents the 'slibbodem' (mud bottom). A pink building outline is shown in the center, with a red vertical line indicating a specific point labeled '705/131'. The profile is divided into 18 vertical sections by thin black lines. Below the profile is a table with four rows of data corresponding to the sections.
