vaste bodem

slibbodem

The figure is a cross-section profile of a waterway. The top part shows a cyan line for the 'vaste bodem' (fixed bed) and a black line for the 'slibbodem' (mud bed). The profile starts on the left with a fixed bed level of 31.58 and a mud bed level of 31.48. It then descends to a minimum fixed bed level of 29.73 and a mud bed level of 29.66, before rising to a peak fixed bed level of 30.91 and a mud bed level of 30.68. The profile then descends to a fixed bed level of 30.43 and a mud bed level of 30.43. The bottom part of the figure is a table with four rows: BODEMPEIL, SLIBBODEM, CUMULAFSTAND, and TUSSENAFSTAND. The BODEMPEIL row shows the fixed bed levels at each station. The SLIBBODEM row shows the mud bed levels at each station. The CUMULAFSTAND row shows the cumulative distance from the start of the profile. The TUSSENAFSTAND row shows the distance between each station.
