

Kunstwerk 6555/51 stroomopwaarts
spoorweg Leuven – Brussel

Technical drawing of a cross-section of a bridge structure. The drawing shows a central span with two large semi-circular arches and a smaller semi-circular arch on the left. The bridge is supported by multiple vertical piers. Dimensions are provided in meters: total width 18.23, height of the central arch 30.02, width of the central arch 6.28, height of the left arch 27.14, width of the left arch 2.62, and various other structural dimensions. The bridge is labeled "Ontlastingsbeek".
